Let me break it down to the simplest form:

XM RADIO

Instant traffic reports for most major cities at any point in the day. GOOD!

Immediate information on storms and severe weather conditions for most major cities. GREAT!

Always have a signal, never cuts out. EVEN BETTER!

AM/FM RADIO

Only get traffic reports when either rush hour is in effect or an accident has occurred. That's like saying traffic is OK any other time of the day. NOT TRUE!

Only get weather updates on the half-hour (if you're lucky). Come to think of it, I can't remember the last time I heard a weather update on my FM stations prior to XM Radio. NOT GOOD!

Can never seem to get the important information to come in clear. Always seems to cut out. BAD, BAD frequency.

Now it's not hard to figure out which one is more beneficial. The biggest point I have is that I PAY for the good quality, fast, updated information. I do not see a problem here. If I'm paying for a service, I don't want to be restricted by what it offers. I want to be provided with the most up-to-date information and I want it to reach me before I'm stuck in the middle of it!

Point being said; PLEASE take this information into consideration when looking at this bill. DO NOT PASS this bill. Do not turn towards the government for help. Just better your services and maybe people will receive your competition with open arms.

Thanks so much for your consideration
Justin Malbrough, a XM Radio subscriber and fan
